## PRESS RELEASE / POSTING

Soventix SA (Pty) Ltd has recently commissioned and handed over a 1,090kWp rooftop solar PV installation for Adcock Ingram

**Wesel, December 20, 2022:** Soventix SA (Pty) Ltd has recently commissioned and handed over a 1,090kWp rooftop solar PV installation for Adcock Ingram, one of South Africa's biggest pharmaceutical manufacturers.

The installed system will generate approximately 1,799 MWh of green energy per annum and mitigate 1,761 tons of CO<sub>2</sub> per year.

Solar PV energy installations are gaining massive tractions in South Africa – primarily due to a lack of stable electricity supply from the national utility provider, Eskom, as well as rising energy fuel costs to run generators. Solar technology has now advanced to the point where it is economically viable for most of the industries and sectors in the country.

Loadshedding is wreaking havoc on the local economy. Feel free to contact Soventix to find out more about how our solutions can mitigate issues caused by rising energy costs and an unstable electricity supply.
