

SOVENTIX GmbH is a leading international project developer in the solar industry. Its core business comprises the ready-to-build development and turnkey realization of high-yield solar parks and hybrid plants for both institutional investors and companies. The activities of the SOVENTIX Group's locations in Germany, Great Britain, Nigeria, Kenya, Rwanda, South Africa, Canada and Chile are coordinated and managed from the headquarters in Wesel, Germany. Soventix UK, with its office in central London, is part of the international Soventix Group, and has the below vacancy:

International Project Manager (m/f/d)

About the role:

As an international project manager, your role will be to project manage the delivery of commercial, industrial and utility scale solar / BESS assets, covering the commercial and technical aspects from contract signature, through delivery to commercial handover.

Your duties will include:

Collaborate within cross-functional teams, including engineers, designers, contractors, to maintain the highest standards of H&S and Quality on projects	Financial management of projects and approvals of invoices
Drive EPC activities and deliverables (Design, Procurement, Construction), chair regular team meetings and ensure minutes and actions are issued	Effectively communicate with multiple stakeholders regarding the project(s) needs and goals
Manage contractual obligations and project timelines	Support Soventix' process for enhancing best practice methods, valuation processes, knowledge management, internal tools & templates

We offer you:

Excellent Company Culture	Trusted responsibilities with opportunities to grow, both personally and professionally
Further development opportunities in an international environment with individual further training opportunities for your professional career	An opportunity to work with friendly, supportive, and collaborative colleagues who are actively contributing to a profitable, growing, and successful global group
International travel opportunities	Hybrid working scheme

Your Profile / Our Requirements

You have a bachelor's degree in Engineering, Project Management, or equivalent experience	You can balance quality in the context of time & cost pressure.
You have a proven track record of project management with experience in grid connected solar projects during the construction phase	Adept at building strong, cooperative and productive relationships with internal and external stakeholders in order to successfully reach project realization;
You can work remotely & independently and be self-motivated within a supportive & collaborative company	You have a proactive and diligent approach
